PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building and maintaining production interfaces for enterprise SaaS platforms. Specialised in Angular and TypeScript, with strong experience in fully bilingual (Arabic–English) applications, RTL/LTR layouts, reusable component libraries, and real-time features over WebSocket and VoIP. Working knowledge of Node.js, Express, and MongoDB for API integration and backend support. Comfortable translating business requirements into clean, maintainable, well-documented code within Agile teams.

TECHNICAL SKILLS

Frontend: Angular (16+), TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, Bootstrap, Tailwind CSS, PrimeNG

Backend: Node.js, Express.js, MongoDB, Mongoose

Protocols & APIs: RESTful APIs, WebSocket, VoIP Integration, i18n/Localization

Tools & Workflow: Git, GitLab CI/CD, Jira, ClickUp, Swagger, Postman, Nx Monorepo

PROFESSIONAL EXPERIENCE

Frontend Developer | Trusted Vision

Remote, Egypt (Jordan-based company) — Sep 2025 – Present

- Develop and maintain frontend modules for GRC Orbit, an enterprise governance, risk, and compliance SaaS platform covering risk management, vulnerability tracking, incident management, third-party risk, and multi-framework compliance mapping (ISO 27001, NCA, SAMA, GDPR), using Angular 16+ and TypeScript.
- Build full bilingual (Arabic–English) interfaces with Angular i18n, ensuring accurate RTL/LTR layout across all modules and localization compliance.
- Collaborate cross-functionally with backend engineers and product stakeholders, managing sprint deliverables through Jira.
- Establish and maintain a reusable Angular component library and technical documentation to keep the UI consistent across the platform's multiple modules and accelerate onboarding.

Frontend Developer | DevSolutions

Hybrid, Egypt (USA-based company) — Oct 2024 – Sep 2025

- Contributed to NexTelco (NexTelcoAI), a cloud-based omnichannel contact center platform unifying voice, SMS, chat, and email with AI-powered routing, chatbots, and workforce analytics, serving both administrators and agents.
- Built campaign management dashboards and chatbot integration interfaces used by contact center agents and supervisors.
- Implemented real-time communication features using VoIP and WebSocket protocols for live call handling and messaging.
- Streamlined deployment workflows using GitLab CI/CD pipelines and maintained technical documentation via ClickUp project boards.
- Participated in Agile sprint ceremonies and conducted peer code reviews, contributing to fewer post-release defects.
